

Stakeholder Evidence Tables

Smart-Recovery Initiative — Qualitative Evidence & Theme Mapping

Theme: Duplicated Work & Manual Workarounds

stakeholder	quote or observation	theme	business impact	confidence level
Daniel Okoye Finance & Compliance Director	"Every status update in the old system requires manual re-keying into the spreadsheet."	Duplicated Work & Manual Workarounds	Direct capacity loss; 72.29% duplicate rate in spreadsheet reconciliations (1,054 duplicate tasks).	High
Christopher Richards Collections Agent	"The collections database does not sync with the email tracker, so agents often re-contact customers who were already promised callbacks."	Duplicated Work & Manual Workarounds	Causes redundant customer calls and increases handle times across 2,450 email actions.	High
Mathew Barlow-Knight Collections Agent	"Most of our experienced agents have learned workarounds that make them faster than any official process."	Duplicated Work & Manual Workarounds	Creates unstandardized records that bypass official compliance tracking (1,405 manual notes).	High
Mr Philip Stone Service Design Lead	"The spreadsheet workaround cost us five hundred thousand pounds in lost recovery last year."	Duplicated Work & Manual Workarounds	Direct financial loss from unrecovered debts and manual administrative overhead.	Medium

Theme: Delayed or Missed Follow-up

stakeholder	quote or observation	theme	business impact	confidence level
Lawrence Bennett Finance Analyst	"We have cases sitting in 'awaiting callback' status for months because the promised date was never recorded."	Delayed or Missed Follow-up	Stalled debt recovery; 327 accounts currently sit indefinitely in Awaiting Follow Up.	High
Catherine Frost Data Analyst	"We lose at least 20% of follow-ups because they fall between shifts and no one owns the handoff."	Delayed or Missed Follow-up	Unowned handoffs drive default escalation in 1,742 early-stage accounts (53.67% of volume).	High
Amina Rahman Head of Debt Recovery Operations	"Cases get stuck in 'pending callback' status indefinitely because the callback date is never enforced."	Delayed or Missed Follow-up	Stagnant queues; 1,275 tasks logged with the outcome code 'next_action_unclear'.	High
Priya Nair Operations Manager	"Simple cases that could be resolved in minutes take days because they get stuck in the wrong queue."	Delayed or Missed Follow-up	Inflated resolution times for straightforward cases suitable for rules-driven self-service.	High

Theme: Poor Account-Status Visibility

stakeholder	quote or observation	theme	business impact	confidence level
Andrea Hunt Operations Manager	"The audit trail is scattered across email, spreadsheets, and the legacy database, making compliance reviews a nightmare."	Poor Account-Status Visibility	Severe compliance risk and prolonged QA auditing across 4 disconnected systems.	High
Mr Philip Stone Service Design Lead	"A single customer can have five separate records in the system from different entry points."	Poor Account-Status Visibility	Record duplication, contradictory outreach, and incorrect risk profiling.	High
Anonymous Compliance Liaison	"A case marked 'resolved' in one system might be 'in progress' in another."	Poor Account-Status Visibility	Data desynchronization leading to wrongful collection actions on settled debts.	High
Mr Martyn Akhtar Operations Analyst	"I cannot tell which customers have already been contacted this month without manually checking three different sheets."	Poor Account-Status Visibility	966 duplicate status checks (69.00% duplicate rate) performed solely to check prior activity.	High

Theme: Customer Friction & Repetitive Contact

stakeholder	quote or observation	theme	business impact	confidence level
Daniel Okoye Finance Business Partner	"Customers call back three times because they do not remember what they were told on the first call."	Customer Friction & Repetitive Contact	High inbound call center overhead; lack of automated written plan confirmations.	High
Robert Quinn Process Improvement Lead	"Customers get transferred between departments and have to repeat their entire situation each time."	Customer Friction & Repetitive Contact	High customer friction, increased call drop-offs, and rising brand churn rates.	High
Eleanor Clark Service Design Lead	"Most customers do not even know they can pay online; they think they have to call."	Customer Friction & Repetitive Contact	Suppressed self-service adoption; drives avoidable manual handling costs.	High
Diana White Collections Agent	"Customers go through the contact process multiple times because we have no way to prevent re-contact."	Customer Friction & Repetitive Contact	Escalated customer complaints and loss of trust in Legacy Trust's operations.	High

Theme: Lack of Confidence in Numbers

stakeholder	quote or observation	theme	business impact	confidence level
Ms Andrea Lamb Collections Agent	"The data quality is so poor that we stopped running management reports altogether."	Lack of Confidence in Numbers	Blind spots for executive leadership; inability to forecast recoveries accurately.	High
Dr Lynda Smith Operations Analyst	"The spreadsheet is now two hundred sheets thick and no one knows what half of them do."	Lack of Confidence in Numbers	High operational fragility reliant on macros and unvalidated offline Excel formulas.	High
Daniel Farmer Finance Analyst	"Reporting takes so long that by the time we see the numbers, they are already out of date."	Lack of Confidence in Numbers	Delayed financial decision-making; inability to adjust contact strategies dynamically.	High
Rebecca Davis Compliance Liaison	"The database was designed for a tenth of the volume we handle now, and performance degrades as we approach month-end."	Lack of Confidence in Numbers	System instability during peak recovery periods, delaying month-end reconciliations.	High

Theme: Change Resistance & Distrust

stakeholder	quote or observation	theme	business impact	confidence level
Thomas Wright Operations Manager	"Agents are afraid to try new things because they were burned by the last system update."	Change Resistance & Distrust	Risk of low portal adoption unless user-centered design eliminates manual re-keying.	High
Daniel Farmer Finance Analyst	"Some agents have been doing this for so long they are faster than the system, and they will resist change."	Change Resistance & Distrust	Persistence of unauthorized shadow spreadsheets despite new portal introduction.	High
Gareth Evans Senior Collections Team Leader	"Leadership approved the roadmap five years ago and never came back to debt recovery."	Change Resistance & Distrust	Cultural skepticism regarding leadership commitment to resolving collections pain points.	High
James Morrison Quality Assurance Lead	"Agents see solutions that the system does not allow them to implement."	Change Resistance & Distrust	Agent frustration and burnout; loss of experienced staff to operational friction.	High
